

PPI Software Release 6.0: Notes For TRAIN Changes

1. In compliance with the Privacy Act of 1974, the employee's Social Security Number is not to appear on documents being forwarded outside of the agency. Under Reports the option is now provided to print the DD Form 1556 with (internal agency) or without (external agency) the Social Security Number.

2. PROBLEMS REPORTED - TRAIN

Problem: When processing PTI 7NL, DIN FHZ is not being auto populated with the data.

---System corrected to auto populate DIN FHZ.

Problem: The User reports that a Group Manager processing a training request for an employee that does not have a login and the help list is used, the manager is receiving an ORACLE error.

---The error message was being erroneously displayed, user was still able to complete the action. Message has been removed.

Problem: The Manager Course Certification and Evaluation Screens were changed to display regular time rather than the 24 hour time. Prefer the 24 hour time display. However time is not a requirement, recommend returning to original status.

---Time display removed from these two screens.

Problem: The Financial User, while viewing the Finance Screen, is unable to view the complete Accounting Classification Number within the block.

---Block resized to display all 110 characters.

Problem: The User reports that the TRAIN performance and response time is deteriorating to the point where it is almost unusable in the field. Inbox refresh time of 5+ minutes are not uncommon inside the CPOC when dealing with typical inboxes.

---The inbox refresh scripts were rewritten to accommodate the growing number of open actions that are in an inbox.

Problem: The information displayed on the Manager Course Evaluation Screen does not match the information on the TRN_108 screen.

---Report corrected to retrieve the data from the appropriate tables.
